School Dental Health Record

All students can achieve healthy oral care, provided they practice protective health habits from childhood and have the opportunity to benefit from present day knowledge of dental disease presentation and control. If your child has not visited a dentist within the last six months, it is advised you make an appointment immediately. If your child already sees a dentist regularly, not appointment is necessary; the dentist should complete the form.

Please have the dentist complete the form below and return to school as soon as possible to complete your child's medical file requirements.
